DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 39 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 39 is vague and indefinite because it depends on claim 34 which has been canceled.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claim 88 is rejected under 35 U.S.C. 102(e) as being anticipated by Johnston et al. (hereafter Johnston) (US006845163B1)

Regarding claim 88, Johnston shows a microphone comprising a plurality of sensors mounted in an arrangement (10). The plurality of sensors are mounted on an acoustically rigid object (since Johnson discloses the sphere simulating the interaural time delay of a human head, the sphere is inherently acoustically rigid object because a human head is an acoustically rigid object and the sound reaching one ear cannot travel internally through the human head to reach the other ear). The limitation that the arrangement enable representation of a beampattern for the microphone as a series expansion involving at least one second-order eigenbeam does not positively state that the series expansion is actually being generated, therefore, it does not serve to distinguish.

Claim Rejections - 35 USC § 103

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

6. Claims 97 and 102 rejected under 35 U.S.C. 103(a) as being unpatentable over Johnston in view of Elko (US006041127A).

Regarding claims 97 and 102, Johnston fails to show the step of decomposing the plurality of audio signals into a plurality of eigenbeam outputs, wherein each eigenbeam output corresponds to a different eigenbeam for the microphone array and at least one of the eigenbeams has an order to two or greater. Elko teaches how to do

so (col. 17, lines 26-33 and Fig. 24) in order to steer the microphone array pattern for maximum reception (col. 1, lines 44-61) by reducing reverberation and noise pickup (col. 1, lines 21-22). Thus, it would have been obvious to one of ordinary skill in the art to modify Johnston by decomposing the received microphone signals as suggested in Elko in order to playback the audio signal containing minimum noise and reverberation.

Allowable Subject Matter

7. Claims 1-3, 7-9, 12-33, 37, 38, 42-53, 58-60, 63-87, 89-96, 98-101, 103-106 are allowable over the prior art in the record.

Conclusion

8. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 12/29/08 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609.04(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
